## RESUME

With over 12 years of experience in software development, I started in the quality assurance field and evolved into a Tech Lead. I have strong expertise in JavaScript, TypeScript, Java, NodeJS, NestJS, Angular, React, and React Native, along with experience in SQL and NoSQL databases. Currently, I am studying Flutter, improving my English, and exploring the development of my own app.

As a Tech Lead, beyond technical expertise, I focus on team leadership, fostering best practices, collaboration, and efficient deliveries. I have experience in leading complex projects from inception to completion, ensuring high-quality standards and team growth. I am always looking for challenges and opportunities in dynamic and innovative environments.

## EXPERIENCES

### **Zé Express | AmBev - Tech Lead** (10/2021 – Present)

I started as a Frontend Software Engineer, working with React Native on an application launched by a third-party company, as well as developing other platforms using React.

Expanding my responsibilities, I began working on the back-end with Java and NestJS, while also contributing to DevOps tasks, including updates with Docker/Kubernetes and AWS services.

Currently, as a Tech Lead, I lead a multidisciplinary team, providing guidance both in technical aspects and in process improvements, focusing on innovation and continuous delivery.

### **Dextra - Senior Frontend Developer** (12/2020 - 10/2021)

I worked on projects for the client Via, developing systems using Angular and React.

I contributed to improving the technical quality, system security, and agile processes of the team, optimizing application performance and promoting efficient development practices.

### **Totvs - Senior Frontend Developer** (05/2012 - 11/2020)

I started in the software quality assurance field, gaining a strong foundation in development best practices. I transitioned into front-end development, becoming a reference within the team and working with Angular and modern technologies.

I also contributed to back-end development, but my primary focus remained on front-end development, always striving for innovation and continuous product improvement.
