- **JavaScript**
- **TypeScript**
- **Angular** (Advanced)
- **React**
- **Vue.js**
- **Node.js**
- **NestJS**
- **Git**

LANGUAGES

- **Portuguese** (Native)
- **English** (Intermediary)

RESUME

My experience with systems starts in 2012, initially in the quality area and after 3 years, migrating to development, focusing on front-end. I was able to acquire great knowledge throughout my career and today I can say that my skills with more experience are JavaScript and TypeScript, using mainly Angular.

EXPERIENCES

12/2020 - Current   Senior Frontend Developer - Dextra

I work for the client Via, on two systems, one in Angular and the other in Reagir, helping, in addition to the front-end activities, to identify improvements in the process as a whole.

05/2012 - 11/2020   Senior Frontend Developer - Totvs

I was hired for the quality area where I acquired a profile that values the quality of code and product, taking care with what I deliver to the end user, after accepting to be a front-end developer, I was able to specialize even more, working daily with o Angular, in a perfect environment for self-development with several challenges.

04/2018 - 10/2020   Senior Frontend Developer - Fieldcorp

I worked with Freelancer on innovations and maintenance in a system made in AngularJS.

One of the main jobs that I consider at this time was to improve the build/deploy of the front, considerably reducing the build time to update the environments and problems generated by cache, as well as speeding up system loading.

COURSES

04/2021 - Current   Inglês - Speak Online

01/2020 - 10/2020   Angular Pro - Ultimate Courses

03/2012 - 12/2014   Técnico em Informática - Senai
